Advanced Excel 2019
Power BI Crash Course
Responsive Web Design
Java Masterclass Certificate

Bongani Xhentsa

Java | SpringBoot | Flutter | Python | HTML5/XML | JavaScript
City of Johannesburg, Gauteng, South Africa

Summary

As a software developer with hands-on experience, I have honed my skills in building and optimizing complex systems, particularly focusing on efficiency and seamless operation. Throughout my journey, I've faced numerous challenges that have deepened my understanding of concurrency, optimization, and system design.

I continually strive for growth by completing hands-on certifications from platforms like freeCodeCamp, AWS, Cisco, and JetBrains, where I'm constantly expanding my knowledge base in software development and emerging technologies. My goal is to craft scalable and efficient solutions, and my journey so far has equipped me with a well-rounded technical skillset and a strong problem-solving mindset.

Alongside my technical expertise, I bring a solid foundation in office administration, backed by an Alison certification. This experience has taught me the value of organization, attention to detail, and clear communication—skills I carry with me in every project I undertake.

I am passionate about software development, always eager to learn and adapt to new challenges. My journey has only just begun, and I look forward to the exciting projects ahead.

Experience

Afrika Tikkun Services

Oracle Certified Java Software Development Associate

January 2023 - November 2023 (11 months)

Randburg, Gauteng, South Africa

-Java Coding, Cloud Infrastructure, Data Management

-Provide code reviews to assess overall code quality and flexibility, and the application of good object-oriented programming techniques.

- Work with and support other developers, applying training in information technology and computer programming to the design, modification, and maintenance of applications programs.
- Develop simple web-based Java Applications and Components. Compile, debug and run Java Applications. Implement functional changes, enhancements, and customization to meet the business and technical requirements of various systems.
- Foundational concepts of Java, including data types, operators, control flow statements, and object-oriented programming principles.
- Explore Java data types, including primitive types and objects, and understand how to manipulate and store data effectively.
- Understanding encapsulation for code organization and reusability.
- Understand lambdas, functional interfaces, and the Stream API.
- Prepare for the Java Associate certification exam.

BritelinkMCT
